

Interactive & Touch Screen Kiosks

Installing a kiosk system is usually the last stage in a project to enable untrained users, clients, or visitors to access information about your museum, exhibition or organization electronically and without the assistance of your staff.

This demands a robust kiosk terminal that combines uncompromising technical performance with outstanding elegance and style.

Our kiosks are compatible with both our digital video players and PC based systems to provide information and media in numerous formats seamlessly and reliably.

- Information only and transactional versions available
- Optional neon illuminated fascia surround
- Easy maintenance access via lockable, hinged front
- Rugged steel and aluminium construction
- Minimal footprint
- Well proven and architecturally sound software platform
- Variety of touch screen sizes available
- Wall mountable or freestanding
- Customised finish and silk screening service available
- Leasing options available
- Industrial quality track ball & button option

What it is:

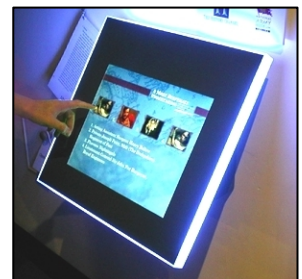

A robust and attractive stand-alone touch screen interactive video and information point.

What it does:

Enables users to access textual, graphic and video information linked or connected to an event or exhibition.

Where it's used:

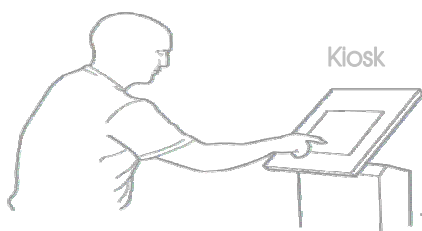

Exhibitions and foyers.

Locations supplied with this kiosk type

Dicoll has over 30 years experience in electronic engineering. In the 1970's we were one of the first companies to bring touch screen technology into the UK, and for almost ten years now we have been manufacturing touch screen Kiosk solutions.

With our origins in the design and manufacture of rugged displays and computers for the Military, our Kiosks are well suited to those environments that demand a stylish but highly resilient product. We have developed an outstanding reputation in the industry for design excellence and rugged build quality and as a result, our Kiosks and touch screens can now be found in some of the most high-use public locations in the UK including:

- London Eye
- Science Museum
- Royal Festival Hall
- South Bank Centre
- The Gateshead Baltic Arts Centre
- The Royal Society
- The Victoria and Albert Museum
- The Imperial War Museum
- The Natural History Museum
- Medway Council
- Birmingham City Council
- Portsmouth City Council
- Millennium Library
