

# AUDIO DONATION BOX

Thank you for purchasing the Audio Donation Box.

Operation of the Donation Box couldn't be easier!  
Simply add a coin or note to activate the message.

The Donation Box also comes with an alarm which  
is activated if it's moved or tampered with.

## INCLUDED

USB Lead

Volume Dongle

USB Flash  
Uploader

(img 1)

## CONFIGURING YOUR DONATION BOX

There are two configuration options for your Donation Box. Adjust Volume and Upload Media. To access these settings you will need to use the 'USB Lead', 'USB Flash Uploader' and 'Volume Dongle' supplied.

Connect USB lead  
here

(img 2)

## ADJUST VOLUME

To adjust the volume first attach the 'Volume Dongle' to the 'USB Lead', then connect the 'USB Lead' as indicated in img 2.

Now activate the Donation Box by dropping a coin through the slot. The unit will play through its configuration options and instruct you to remove the 'Volume Dongle' when it gets to the volume settings option.

Listen to the instructions and remove / replace the Dongle at the required setting.

## UPDATE MEDIA CONTENT

Programming the Audio Donation Box couldn't be easier. You will need 3 things;

**Note: Files must be .mp3 format**

1. 2 .mp3 audio files (includes alarm sound)
2. The supplied USB Lead
3. The USB Flash Uploader stick provided

Please note: If provided USB stick is not available use a USB stick less than 1GB in size if possible, if you have issues uploading your files please first retry with a different USB stick.

### Step 1

Place your audio files on the 'USB Flash Uploader'. Drag and drop your files from PC to USB stick one file at a time, **the sequence in which you transfer the files is important not their title.**

The first file you transfer will be the audio message activated upon use of the Donation Box, the second files you transfer must be the Alarm sound.

### Step 2

Attach your 'USB Flash Uploader' to the 'USB Lead' then connect the 'USB Lead' as indicated in img 2. Now trigger the unit by placing a coin in the slot and remove / replace the 'USB Flash Uploader' at the second option.

### Step 3

The Donation Box will now tell you it's transferring your files or inform you if there is an issue.

You will be asked to wait until it's finished. This could take a number of minutes depending upon the size and length of files you are transferring.

When finished the Donation Box will inform you and ask you to remove the 'USB Lead'. Donation Box is now ready to use with the updated message. Test it just to be sure, and enjoy!

## SPECIFICATIONS

### Messages

Message storage medium:	64MBit Flash Memory (on board)
Maximum number of messages:	2 files (including alarm)
Message encoding format:	Mp3
Maximum total message length:	>16 minutes @ 64kbs

Message activation via sensors

### Bitrate (kbs) / Average length of all audio (minutes)

16kbs	67.00
24kbs	43.00
32kbs	30.00
64kbs	16.00
96kbs	11.00
128kbs	8.00
160kbs	6.30
192kbs	5.15
256kbs	4.00
320kbs	3.00

Note: times may vary depending upon the audio complexity, this is only a guide

### Message Output

Playback sample:	Mono
Audio output:	1W into 8ohm speaker
Freq. range:	75Hz-20kHz

### Power

External power supply 9 to 16V DC (12V nominal) / 500mA  
With 4 backup 1.2V long life batteries.

### Weight

17kg
